

Pay As You Save

'Energy Solutions delivered immediate and significant energy cost savings and clarity on what's using the most energy which will allow us target further savings' – Colm O'Cleirigh, Managing Director, Westcourt Management Services

Our services:

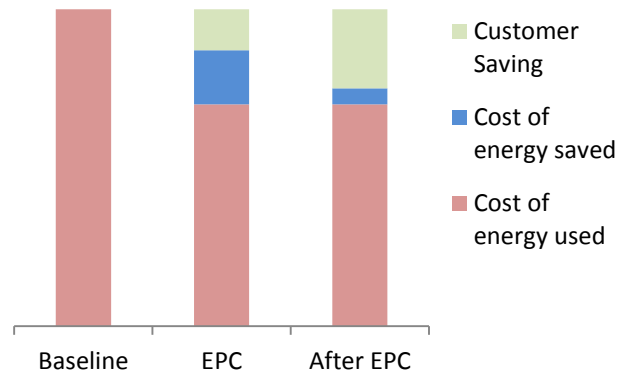

*Energy procurement
Energy management
Energy consultancy
Monitoring and reporting
Energy supply contracting
Energy performance contracting*

Energy Solutions are certified monitoring and verification professionals

What is it?

Our Energy Performance Contract is simple. It basically guarantees sustained energy cost savings. This means that Energy Solutions is committed to delivering real energy savings to our clients with **no upfront cost**.

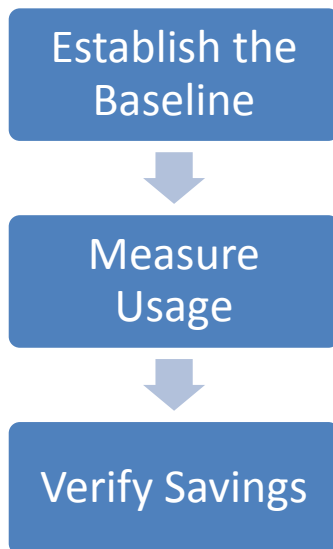

Energy Solutions identify energy savings through projects such as energy efficient lighting, efficient pumps and measurement & management, install the equipment and recover the cost through shared energy savings.

How are savings calculated?

The **baseline** energy use is established by measuring energy used before implementation of energy efficiency initiatives. Energy metering is installed as part of the project and savings measured according to Monitoring and Verification Protocols.

Energy Solutions are Certified Monitoring and Verification Professionals by the Efficiency Valuation Organisation. This the body for measuring energy savings recognised by the Sustainable Energy Authority of Ireland.

Energy Performance Contracting

“The traditional approach to energy management requires management time and financial resources to achieve energy savings” – Sustainable Energy Authority Ireland

Control Your Costs

An Energy Performance Contract will provide guaranteed and measured energy cost savings.

Just as importantly the linked energy management services will provide detail and understanding on what's using energy, how much it costs and where more savings can be made.

This will lead to increased and sustained energy cost savings over time.

No Surprises

We will ensure that your bills are accurate and controlled taking away the risk of inaccurate or unexpected large bills.

What about costs of equipment or upgrades?

We will install energy efficient equipment at our cost to deliver the savings identified. We will arrange finance and take all performance risk.

Shared Savings

Savings achieved by improved management are shared between Energy Solutions and our customers giving greater potential for cost savings.

Whole Site Guarantee

We offer outsourced energy management and guaranteed overall energy cost savings. Our remote metering and monitoring facility Each monthly performance report details the units used, the units saved and the cost savings.

Specific Projects

For larger sites or for sites with energy management resources, we offer to implement specific energy efficiency projects and to guarantee the energy savings on the energy use targeted (eg motors or fans).
